

Sonomed Escalon™

## AXIS™

### Image Management Done Right

#### Reliability

You can count on Axis™ to be a workhorse day after day without fail – see what a difference our rock-solid platform makes.

#### Speed

Images delivered across the web with blazing speed, available the moment you need them.

#### Connectivity

Easily manage all images from any device regardless of modality, manufacturer, or location... OCT, photography, visual fields, ultrasound, and more.

#### Conversion

If your current image management system is not meeting your needs you can seamlessly convert to Axis™.

## Reliability

Designed from the ground up using the latest generation web tools and an efficient and powerful database engine, the architecture of AXIS™ is exceedingly robust to ensure continual performance. We invite you to speak with many of our satisfied customers who have experienced the difference in reliability that AXIS™ represents.

## Speed

The same architecture that makes AXIS™ extremely reliable is also the key to what makes AXIS™ significantly faster than other image management systems. Our use of image pushing makes them immediately available without having to wait for excessive download queues.

## Connectivity

Easily manage all images from any diagnostic device, regardless of modality, manufacturer, or location. OCT, fundus imaging, slit lamp photography, visual fields, ultrasound, and more.

AXIS™ is accessible via any standard web browser – such as Microsoft Internet Explorer, Google Chrome, Mozilla Firefox, Apple Safari – and on devices such as a PC, Mac, iPhone, iPad or other tablet PC. This means you can access patient records from any computer via a high-speed Internet connection – in your main office, exam room, laser room, remote office, home, or on the road.

AXIS™ seamlessly integrates diagnostic results with EMRs via our Direct Access option or HL7. HIPAA compliance is ensured with secure access control, data encryption, system security, and user access auditing.

## Conversion

The benefits of AXIS™ are numerous, from faster image availability to increased reliability to significantly lower cost of ownership. If your current image management system is not meeting your needs, you can seamlessly convert to AXIS™, retaining patient records and archived images. Getting started is easy – just contact us to find out how.
